

The Networked Workplace

Use of the Internet and email can present problems for any business.

In today's "online" work environment it's essential that all employees understand the laws that apply to the use of email and the Internet, including laws of defamation, privacy, trade practices, illegal content, intellectual property, consumer protection and computer security.

Issues surrounding an employers' right to monitor, addressing and removing email, using resources wisely and how to deal with Commonwealth Government Data are also covered.

Content by: Gilbert + Tobin Lawyers

Designed for: Managers, employees and contractors

Duration: Approximately 50 minutes
