

Policy Manager

Our Policy Manager program ensures the right policies and procedures get to the right people and that you have a record of their acceptance.

Businesses are required to communicate an extensive, and ever growing number of policies and procedures to employees. Manually managing this task is demanding and time consuming for any HR department, legal department or compliance manager.

Imagine being able track which employees have been given access to what policies and easy access to records showing of who has acknowledged acceptance of those policies and when.

ComplianceNet's Policy Manager makes this arduous and time consuming process quick and efficient to manage without the need to handle physical documents.

How it works

The Policy Manager

- Demonstrates governance and best practice
- Accurately tracks employee acceptance and understanding of key policies and codes of conduct
- Allows you to respond to Senior Managements' or Regulators' inquiries with ease
- Improves efficiency and reduces compliance costs

The Policy Manager can be used to track acceptance and understanding for industry codes of conduct, safety plans and procedures and job training manuals.

This program may be deployed as a standalone program or as a module in your Induction program.
